ABOUT ME

I am a Full Stack Web Developer and Computer Technician, passionate about technology. I seek new experiences to develop my skills and improve them.

In my leisure I like to play videogames, watch sports car racing, research automotive mechanics; they are things that I am as passionate about as IT, so I am always researching and learning about these worlds.

PROJECTS

Full Stack Web Developer | HenryGames

JUNE 2022 - JULY 2022

Design and development of a **Single Page Application** with a **team** of 7 people besides me.

This page is an E-commerce website about video games, from where we can see information about each game, filter by different categories, classifications by age, etc. We can login to see the games in our library, see a video games news blog, among other things.

My job was to make a **login** with **Auth0**, **Passport** and **Google**, a payment gateway with **MercadoPago**, Components made with **React-Redux**, Page styles with **CSS**, versions management with **Git Bash** and **GitHub**.

Full Stack Web Developer | Dogs App

MAY 2022 - JUNE 2022

Design and development of a **Single Page Application**, **individually**.

On this page we can find detailed information on a wide variety of dog breeds, you can filter for a better search or order them; You can create, edit or delete your own breed of dog.

My job was to make components with **React-Redux**, Page Styles with **CSS**, a **database** managed with **Sequelize** and **PostgreSQL**, **BackEnd** routes with **Express JS**, versions managements **Git Bash** and **GitHub**
